

Abdullah Al Noman

Software Engineer | Backend & Cloud-Native

+88 01775664595 | official.aanoman@gmail.com | [github](#) | [Portfolio](#) | Shewrapara, Dhaka

PROFILE

Software Engineer specializing in Python/Django and Node.js. Experienced in architecting scalable microservices, real-time systems, and cloud-native solutions using Docker and AWS. Committed to writing clean, efficient code for complex industrial applications.

EDUCATION

B.Sc. in Computer Science and Engineering

University of Asia Pacific | Jan 2021-Dec 2025

SKILLS

- **Languages & Framework:** Python, Java, JavaScript, C++, SQL, Node.js, Next.js, Django, DRF, React.
- **Cloud:** Docker, AWS (EC2), Nginx, CI/CD, Redis, Celery.
- **Databases:** PostgreSQL, MongoDB, SQLite, MySQL.
- **Tools:** Git, Postman, Ollama, VS Code, Playwright, Websocket.

EXPERIENCE

Software Developer Intern | IGL Web Ltd |

Dhanmondi, Dhaka | [Feb 2026 – Present]

- Developing industry-level full-stack applications using **Django REST Framework** and **Node.js**.
- Architecting scalable microservices with **Docker**, managing cloud deployments, and implementing **Celery & Redis** for caching.
- Building real-time communication features utilizing **WebSockets** and automating testing workflows with **Playwright**.

Backend Developer Intern | [Eutropia IT]

Dhaka Uddan Housing, Dhaka | [1Aug 2025] – [30Dec 2025]

- Collaborated with cross-functional teams to integrate backend services with responsive frontend interfaces.
- Designed RESTful APIs using Django and optimized database queries (SQL/MongoDB) for high-traffic modules.

PROJECTS

AI-Powered Upcycling Platform (RemakeX) | [Github Repository](#) 2025

- Engineered a full-stack product management platform using Django, featuring a local AI chatbot powered by Ollama for privacy-preserving, offline interactions.
- Designed and implemented a sustainable upcycling module to track product lifecycle extensions, promoting eco-friendly practices.
- Developed a comprehensive system architecture with SQLite for rapid prototyping, demonstrating clear separation of concerns between core logic, UI, and AI services.
- **Deployment:** Successfully deployed the beta version on PythonAnywhere cloud platform to demonstrate public access.
- **Technologies:** Python, Django, Ollama, SQLite, HTML, CSS, JavaScript.

Cloud-Native Inventory Management API | [GitHub Repository](#) 2025

- Built and deployed a production-ready 3-tier REST API on AWS EC2 using a fully containerized environment with Docker and Docker Compose.
- Automated the entire development lifecycle by creating a CI/CD pipeline with GitHub Actions for seamless builds and deployments.
- Configured Nginx as a reverse proxy for secure traffic management and optimized a PostgreSQL database for persistent data storage.
- **Deployment:** Previously configured and deployed the system using Docker and DuckDNS for remote accessibility.
- **Technologies:** Python, Django REST Framework, PostgreSQL, Docker, Nginx, AWS EC2, GitHub Actions.

ACHIEVEMENTS

- **Awards & Contests:** Received VC Award for academic excellence; Selected for ICPC 2022 Preliminary and won multiple intra-university programming contests.
- **Leadership & Volunteering:** Served as President of UAP Indoor Games Club and Volunteer at the 45th ICPC World Finals (Nov '22)
